Task 1

Why did you choose Animation Arts?

Animation offers creators a great deal of freedom to express themselves. For example, the characters could have exaggerated expressions and behaviors, also the worldview and background could be imaginative and fantastic. In addition, the visual language of moving images could support our ideas with strong vitality and emotions. I find it interesting and expected to see diverse reactions from the audience. It could be inspiring or making someone feel touched, then more and more thinking and emotions generate here. I was excited to see that!

What inspires you within the Animation culture/community?

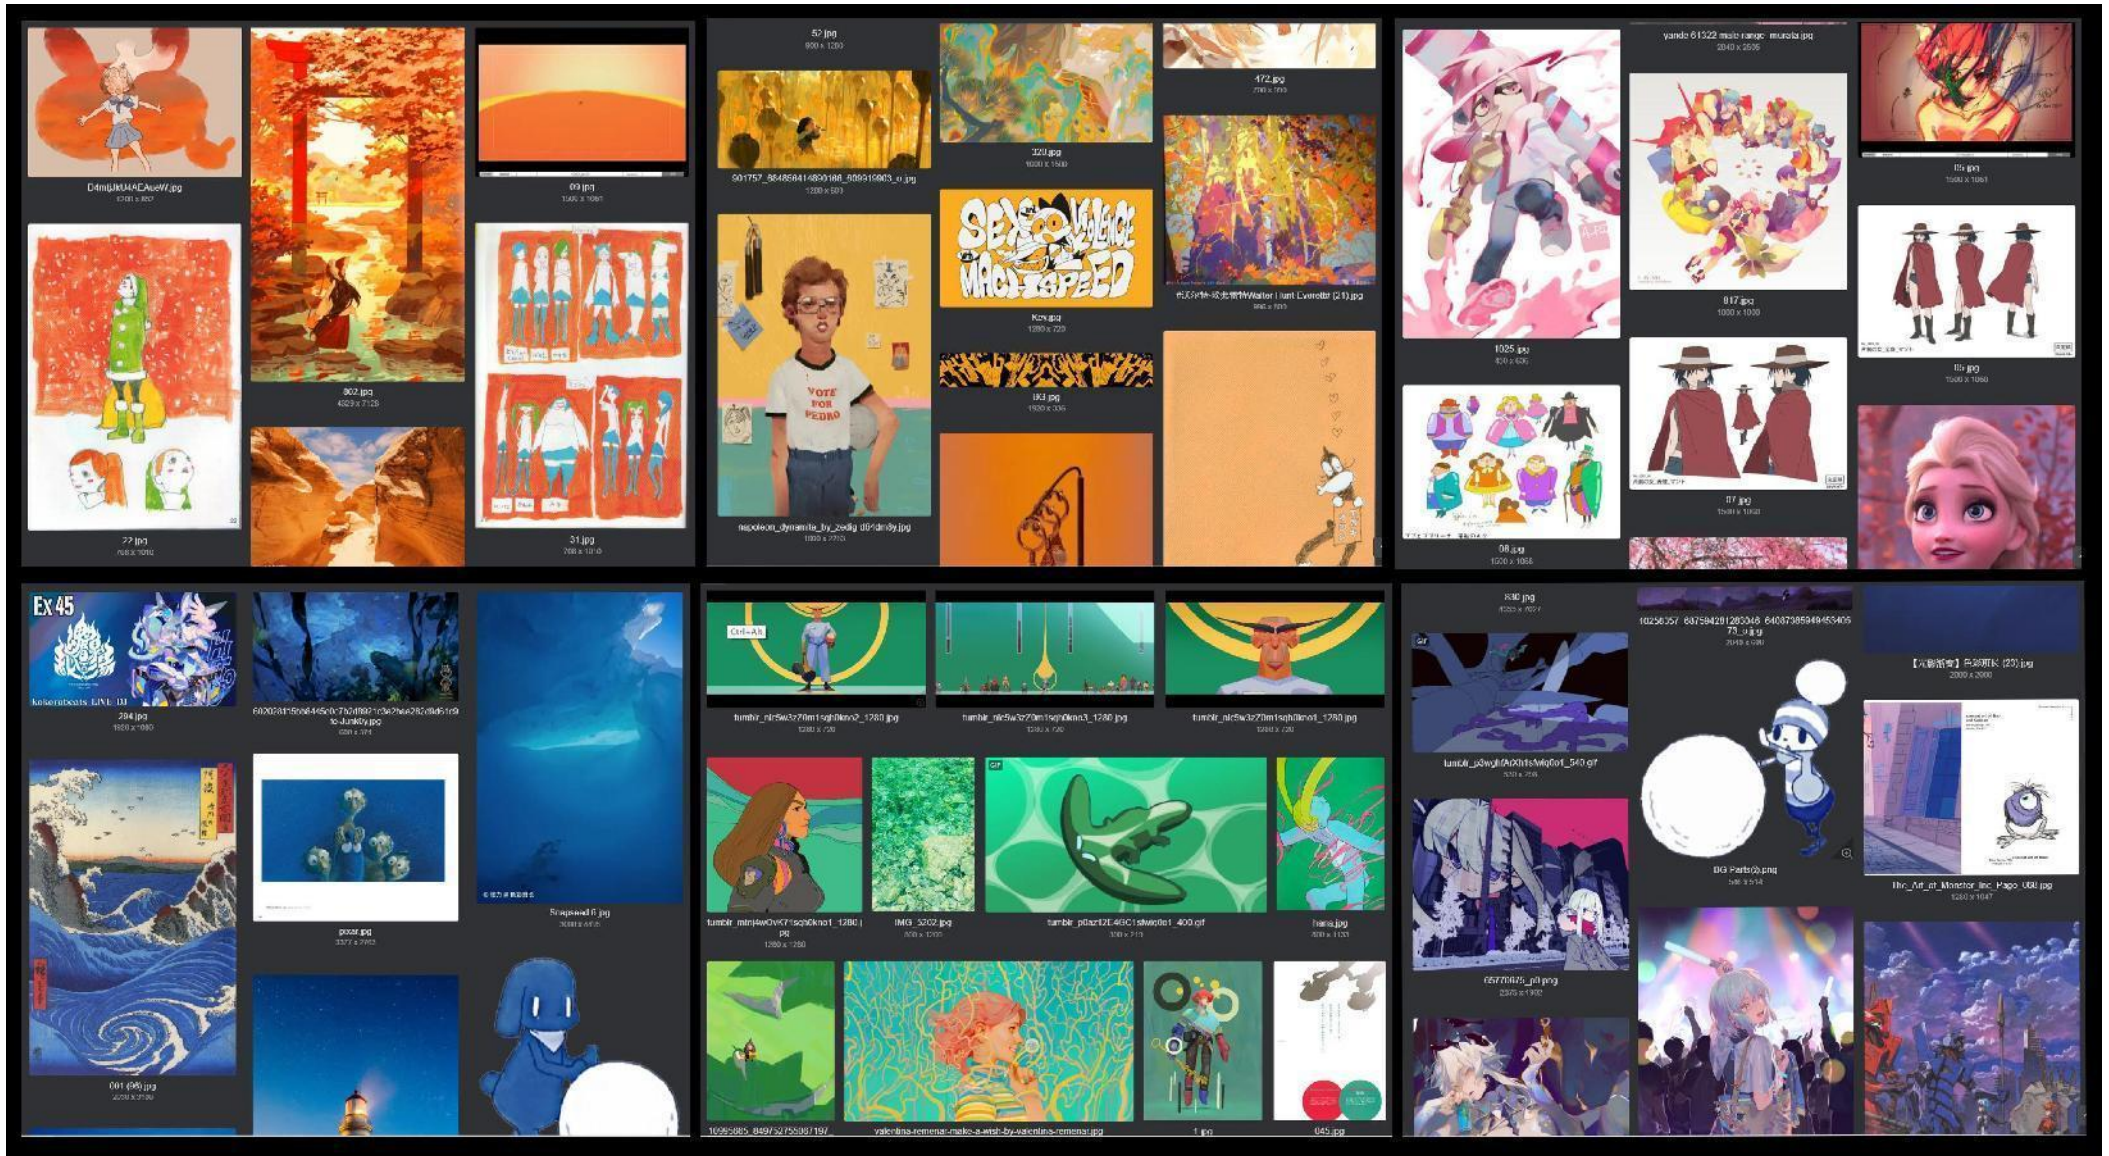

The various design of storyboards and different angle settings from the distinctive animators would inspire me that there are so many unique, stylish but also communicative expressions. This would push me to explore my own visual language more motivated. Also, knowing more about the original intention of the creators and the feelings they'd like to convey, could give me inspiration on thinking about my origin, which is essential to keep my work alive and full of energy the whole time.

What do you hope to gain from the Animation Arts pathway?

I'd like to convey my ideas accurately and efficiently by improving my visual communication skills. Also, I am thinking of exploring subjective and experimental expressions more, so I hope to interact with a wider range of materials and media, learning and researching a vary kind of expression styles from different cultures and countries broadly.

Task 2

Scrapbook

[illegible]

Task 3

Inspiration

When I was walking on the road, I found that the green grass grew from the gap of stone bricks. The vivid colors bring vitality into the city, and it's love from nature for our human beings! This gives me inspiration to feel the love of natural environment. I would like to show the essence of eternal love by presenting the individual's love and boundless love from the world.

The abandoned bunch of flowers.

Moodboard

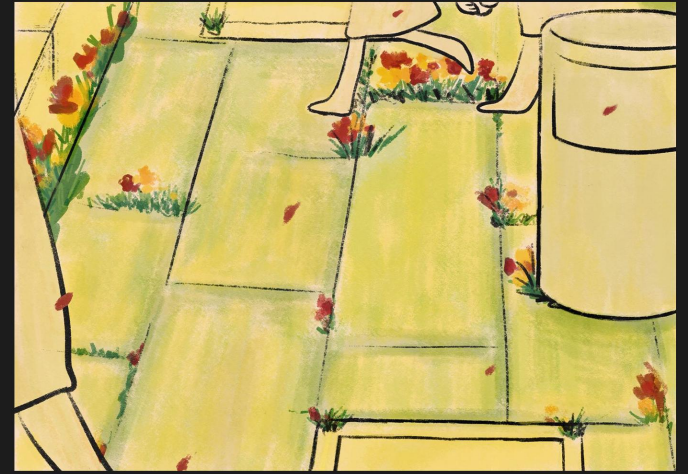

Visual Poetry

Love was abandoned

destroyed over and over again

but it never disappeared
